Objective

Software Engineering student with hands-on experience across Software Development, Artificial Intelligence and Machine Learning, and Cybersecurity. Experienced in developing responsive web applications, integrating REST APIs, working with databases and state management, building machine-learning pipelines, and performing practical cybersecurity activities in Linux-based laboratory environments. Currently working as a Software Engineer Intern and actively developing skills in full-stack development, AI/ML, and security engineering.

Education

YBN University <i>Bachelor of Technology in Software Engineering</i> CGPA: 8.14	Ranchi, Jharkhand, India 2023–2027
D.A.V. Public School <i>Higher Secondary Education</i> Percentage: 63%	Gumla, Jharkhand, India 2021–2023
D.A.V. Public School <i>Secondary School</i> Percentage: 75%	Gumla, Jharkhand, India 2019–2021

Technical Skills

Software Development: C, C++, Java, Python, JavaScript, HTML5, CSS3, ReactJS, Node.js, Express.js, Redux, Redux-Saga, React Router, Material-UI (MUI), Tailwind CSS

AI / Machine Learning: Python, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Natural Language Processing (NLP), Data Preprocessing, Classification, Model Evaluation, Hyperparameter Optimization

Cybersecurity: Kali Linux, Linux CLI, Wireshark, Nmap, Network Analysis, TCP/IP, SSH, Virtual Machines, Cybersecurity Labs, MITRE ATT&CK Fundamentals

Databases: MySQL, Microsoft SQL Server, PostgreSQL, MongoDB, Oracle SQL

Cloud & DevOps: Docker, Kubernetes, Jenkins, Git, GitHub, AWS, Microsoft Azure, Google Cloud Platform

Computer Science: Object-Oriented Programming, Data Structures and Algorithms, Operating Systems, Computer Networks, Linux/UNIX, System Design

Development Tools: VS Code, IntelliJ IDEA, Postman, Swagger, Figma, Anaconda

Experience

Eimples Lab <i>Software Engineer Intern</i>	Remote June 2024–Present
○ Designed and developed responsive user interfaces for the Organisation Panel using ReactJS. ○ Developed reusable and component-based React architecture to improve maintainability and development efficiency. ○ Built interactive and responsive UI components using Material-UI (MUI). ○ Implemented client-side navigation using React Router and BrowserRouter. ○ Integrated REST APIs to retrieve, manage, and display dynamic application data. ○ Used Redux-Saga for asynchronous state management and API handling. ○ Debugged application issues and optimized components for improved performance and maintainability. ○ Implemented responsive layouts for consistent user experiences across desktop, tablet, and mobile devices.	
Deployed Work: www.jankoti.com	

Projects

Cybersecurity Virtual Lab

- Built a practical cybersecurity laboratory using Windows, Kali Linux, and Ubuntu Server virtual machines.
- Practiced network discovery, packet analysis, Linux administration, and secure file transfer in an isolated lab environment.
- Used Nmap and Wireshark for network reconnaissance and traffic analysis.
- Studied attack-chain concepts using the MITRE ATT&CK framework in controlled laboratory scenarios.

Research Work: Wheelchair and Exoskeleton Technology

- Conducted research on assistive mobility technologies, including robotic wheelchairs and wearable exoskeleton systems.
- Studied exoskeleton mechanisms, control approaches, and applications in rehabilitation and mobility assistance.
- Investigated challenges related to human–robot interaction and assistive movement.

Research Work: GPS-Denied UAV Navigation

- Conducted research on obstacle detection for UAVs operating in GPS-denied environments.
- Investigated detection of thin and difficult-to-detect obstacles such as wires and fences.
- Studied computer vision and sensing approaches for UAV navigation and obstacle avoidance.

Research Interests

Artificial Intelligence, Machine Learning, Cybersecurity, Software Engineering, Computer Vision, UAV Navigation, Assistive Robotics, Exoskeleton Systems, and Human–Robot Interaction

Extra-Curricular Activities

Active member of the Coding Club at YBN University.
